

Stroops SXR Rower

Model Number: SXR Rower

We're driven because you're driven. The SXR Rower is a premium piece of cardio equipment that features a portable design. This machine will get your heart rate going at a high level while building muscle in your arms, shoulders, and back. The attached wireless monitor will track your heart rate and other metrics and is programmable for interval functions.

A Study in Perfection. Using high-quality materials for construction, the SXR Rower is finally engineered and provides a smooth rowing motion from the beginning of the workout. You won't need an overpowering initial "startup" pull to get to work. Just get settled into the ergonomic seat, strap into the adjustable footholds, grab the non-slip handle, and get rowing. Get started on this machine without having to force a "startup" pull, and push yourself to the limit with the SXR Rower.
