

Better Bones, Better Blood, Better Balance.

The bioDensity system safely aids in increasing bone density by stimulating the body's natural bone generation process. Based on the science of Wolff's law, the principle demonstrating bone adaptation to applied pressure, the bioDensity process applies optimal biomechanics for the self-compression of bone mass. In addition, these compressive forces stimulate the growth of tendons and ligaments, increasing the strength and stability of joints. Four safe and precise compressive movements (Chest Press, Leg Press, Core Pull, and Vertical Lift) are performed to stimulate all major muscle groups, joints and bones of the body.

Unlike other modalities, all loads are self-applied and regulated by the user's level of comfort. As a result, each application of compressive load is both safe and effective when used as directed. In addition, each user's performance is carefully monitored and reports are generated immediately following each session.

<b>Dimensions:</b>	Machine Only = L: 91" W: 33"(22" w/o arms) H: 57" When Crated = L: 96" W: 29" H: 68"
<b>Weight:</b>	Machine Only = 800 lbs. / When Crated = 1162 lbs.
<b>Power:</b>	100-240V 50/60hz 10A
<b>OS:</b>	Windows 11
<b>Monitors:</b>	2 x 15" color touch screens
<b>Certifications:</b>	CE
<b>Warranty:</b>	5 years frame against manufacturing defects, 3 year hardware components, 2 year electronics, 1 year labor
<b>Hardware:</b>	Made in the USA Solid steel frame Commercial grade motors Adjustable leveling feet Ergonomically designed seat back and hand grips Standard white (custom colors available at extra cost)
<b>Requirements:</b>	Safely accommodate users of most ages and heights. Minimum height requirement is 4'10". Internet connection: Hard-wired internet required

Performance report showing progression over time cross-referenced with age and gender specific normative data.
